Corporate Overview

WOW Technology Inc. draws on 15 years of accumulated technological expertise in laser, optical and image processing. The company set out in 2002 to revolutionize the standard input device paradigm for the IT and telecommunication industries. WOW Technology's goal was to develop a product line that is technologically advanced, ergonomically designed, easy to use, and all wrapped into one compact package.

In the PC space, the company has recently released the Wow-Pen Mouse. The Wow-Pen is a pen shaped optical mouse with handwriting pen features, It was hailed by Microsoft as one of the "top 5 hot prospects" at the 2006 CES in Las Vegas. "One of the top five office products you won't be able to live without..." The portable device is a fully functional optical pen mouse. It's easier to hold than other pen devices (reducing carpal tunnel strain), offers the latest in anti-bacterial properties, and enables the user to handwrite on a variety of applications.

Since WOW Technology's core technology is optical recognition and high quality image production they have been able to bring other highly innovative and related to products to market including: a long distance security camera that can identify ships registration and container's ID or from a distance up to 500-600 feet in day or night time; license plate capture system accurate up to 250 meters; emergency response systems using enhanced digital surveillance.

WOW Technology holds 8 patents on its technologies.

WOW Technology Inc.

WOW Technology Products and Solutions

- **Digital Pen and Mouse** -- Allows for secure digital document creation, storage and management using a common pen-like device. Allows any skill level to operate a computer merely by using a standard pen interface, to manage documents related to ships, cargo, vessels, vehicles, access point and store in secured manner.
- **Hawk-Laser II -- Long Range Laser Detection Camera for Night or Day**
Captures and detects any object up to 500-600 feet in any circumstance.
Applications include perimeter security, ports, tunnels and bridges
- **EBSI-200 -- Emergency Response Surveillance System**
Interactive surveillance system that allows camera positioning, targeting and remote viewing through internet and other networks.
